

Technical Product Information

Insulating Sleeve for WEM Heating Manifold

Article 17201

Scope of application

For insulation of WEM Heating Manifolds, especially when used in cooling mode.

The insulation sleeves have a standard length of 67 cm and are trimmed to the respective length of the heating manifold.

Benefits

- self-adhesive
- one insulation sleeve each for the front and the rear side

Technical data/
materials

Material:	Cross-linked polyolefin foams
Bulk density:	29 kg/m ³
Thermal conductivity (λ):	0.0345 W/(m·K) at 0 °C; 0.359 W/(m·K) at 10 °C; 0.398 W/(m·K) at 40 °C

Material requirements:

Manifold with 2 to 6 heating circuits:	1 set
Manifold with 7 to 12 heating circuits:	2 sets
